Time	Agenda
14:00-17:30 Ballroom G-L Level 3	The 12th China-LAC Infrastructure Forum
	Opening Remarks ● Li Chenggang China International Trade Representative and Vice Minister, Ministry of Commerce, China (Video) ● Juan Anthony EDGHILL Minister, Ministry of Public Works, Guyana
	Keynote Forum: Green and Digital Drivers for a Shared Future: Fostering New Progress in China-LAC Infrastructure Cooperation
	In recent years, cooperation between China and Latin America and the Caribbean (LAC) has been shifting from traditional construction to a green, digital, and intelligent model, driven by the dual forces of the green and low-carbon transition and advances in digital technology. The 12th China-LAC Infrastructure Cooperation Forum, themed "Green and Digital Drivers for a Shared Future: Fostering New Progress in China-LAC Infrastructure Cooperation," seeks to implement the consensus reached at the Fourth Ministerial Meeting of the China-CELAC Forum and steer China-LAC cooperation toward a more innovation-driven and intelligent future. Against the backdrop of a profound reshaping of global infrastructure, China's technological strengths in 5G, big data, and clean energy are highly complementary to the enormous needs of LAC countries in areas such as energy transition, digital connectivity, and smart city development. The forum will highlight China-LAC connectivity, explore cutting-edge practices in green and digital-intelligent technologies, and unlock cooperation potential in connectivity, scientific and technological innovation, and energy transition. In doing so, it aims to help build an even closer China-LAC community with a shared future and foster new progress in China-LAC infrastructure cooperation. Moderator ● Liu Dajiang Deputy Director General, Department of American and Oceanian Affairs, Ministry of Commerce, China Speakers ● Zhang Run Director General, Department of Latin American and Caribbean Affairs, Ministry of Foreign Affairs, China ● Wang Qi Deputy Director General, Department of Outward Investment and Economic Cooperation, Ministry of Commerce, China ● Kirk D. A Platform for Strategic Dialogue and Shared Opportunity Through thought leadership, solution exchange, and partnership dialogue, this special session aims to foster a more integrated, innovative, and resilient infrastructure financing ecosystem—unlocking new opportunities for high-quality international cooperation and long-term shared growth.
15:00-17:00 Ballroom E Level 3	Roundtable: Digital & Intelligent Future, Accelerating the Digital & Intelligent Transformation of the Transport Sector This roundtable meeting, themed "Digital & Intelligent Future, Accelerating the Digital & Intelligent Transformation of the Transport Sector," convenes transport ministers from around the world alongside top-tier EPC industry leaders. The meeting aims to chart a collective blueprint for the digital and intelligent transformation of the global transport industry. Discussions will center on the deep integration of digital intelligence within the transport sector. Key topics include how these technologies are reshaping the industry ecosystem, the core value they generate, and the shared challenges encountered in the drive toward comprehensive intelligence. Through this high-level dialogue, we aim to break down barriers, build cross-sector consensus, and jointly explore new pathways and opportunities for high-quality development in international transportation engineering. Moderator ● Huawei Opening Speech ● Fang Qiuchen Chairman, China International Contractors Association ● Ma Yue Vice President, Huawei/ CEO of Smart Transportation BU, Huawei Prospects for the Future Development of Digital-Intelligent Transportation Speaker ● Sun Tao Director of Smart Transportation BU MKT & Solution Sales Dept, Huawei

Parallel Forum

Time	Agenda
June 12, 2026 (Friday)	
09:30-12:00 Ballroom J Level 3	Parallel Forum 1: Empowering Renewable Energy with Hydrogen and Energy Storage in a New Era
	Against the backdrop of the deepening global transition toward green and low-carbon energy, renewable energy is scaling up rapidly, placing higher demands on energy security, power system stability, and flexible regulation capabilities. Hydrogen energy and energy storage, as critical pillars for building new-type power systems, are emerging as key engines to address renewable energy integration challenges, enhance energy security, and drive high-quality industrial development. Themed "Empowering Renewable Energy with Hydrogen and Energy Storage in a New Era," this forum will focus on the integrated development of hydrogen and storage, energy security, and coordinated innovation across "generation, grid, load, and storage." It will facilitate exchanges on key topics including cutting-edge technological breakthroughs, business model innovation, and coordinated industrial chain development, exploring new pathways to coordinate large-scale development of new energy and energy security. The forum will bring together representatives from government agencies, research institutions, financial institutions, and leading enterprises across the industrial chain to jointly explore the future direction of modern energy system construction and high-quality industrial development amid the green and low-carbon transition.
	Moderator ●Li Sisheng Executive Vice President, POWERCHINA International Group Limited
	Welcome Remarks ●Fang Qiuchen Chairman, China International Contractors Association ●He Yanfeng Vice President, Power Construction Corporation of China ●Xi Hao Executive Deputy Secretary General, China Society for Hydropower Engineering (CSHE)
	Keynote Speech ●Ye Fan Vice President, Mingyang Smart Energy Group Limited ●Ouyang Zi President of the Product and Solutions R&D Centre, JA Solar Technology Co., Ltd. ●Dr. Yang Gang Senior Vice President and Head of Sales and Marketing, China, Hitachi Energy ●Jin Feng Professor and Chair, Academic Committee, Department of Hydraulic Engineering at Tsinghua University ●Fang Wei Deputy General Manager, Sunshine Hydrogen Technology Co., Ltd.

时间/地点	议程
09:30-12:00 三层宴会厅 J	圆桌对话 本次圆桌对话将围绕“风光储氢—新能源规模化发展的机遇与挑战”这一主题展开，深入探讨新能源发展面临的瓶颈、氢能距离真正的规模化和商业化还有多远、储能未来的核心竞争力所在、风光氢储一体化的机遇，以及在全球能源转型背景下，氢能与储能如何重塑能源生态。 主持人 ● 尚 蕊 日立能源（中国）有限公司海外 EPC 业务负责人 发言嘉宾 ● 黄晓宏 智信能源科技有限公司总经理 ● 张胜祥 华为数字能源智能光储产品线首席专家 ● 郭晔洲 标银投资咨询（北京）有限公司能源和基础设施副总经理 ● 陈维隆 新加坡盛裕集团国际能源高级执行总监 ● Peter Thompson 奥雅纳董事、东亚区能源业务负责人 ● Greg Mittman HySights 首席执行官
	平行论坛 2：可持续投融资赋能非洲绿色基建 —2026 国际可持续基础设施促进机制（MISIP）年会 当前全球气候风险不断攀升、生物多样性保护的重要性持续凸显，2022年联合国《生物多样性公约》第十五次缔约方大会（COP15）通过了“昆蒙框架”，其所倡导的“自然向好”目标，与全球基础设施绿色转型趋势深度契合。非洲拥有巨大的基建投资空间与丰富的可再生能源潜力，依托气候韧性投资与蓝色金融等可持续投融资模式，赋能兼具气候与自然双重韧性的绿色基建，已成为中非深化务实合作的重要方向。 本次平行论坛暨2026 MISIP年会，衔接中非合作论坛相关承诺，围绕可持续投融资创新，自然与气候韧性基础设施建设，基建与森林保护及可持续渔业协同发展等议题，分享自然友好型基建项目的投融资实践，为支持非洲绿色转型探索可落地的合作路径。 主持人 ● 张 湘 中国对外承包工程商会副会长

Time	Agenda
09:30-12:00 Ballroom J Level 3	Engineering at Tsinghua University Panel Discussion This Panel discussion will focus on the theme "Wind, Solar, Storage, and Hydrogen—Opportunities and Challenges for Large-Scale Development of New Energy," delving into bottlenecks in new energy development, how far hydrogen is from achieving true large-scale and commercial deployment, the core competitiveness of energy storage in the future, opportunities in integrated wind-solar-hydrogen-storage systems, and how hydrogen and energy storage will reshape the energy ecosystem against the backdrop of global energy transition. Moderator ● Shang Rui Head of Overseas EPC Business in China, Hitachi Energy, Hitachi Energy (China) Co., Ltd. Speakers ● Huang Xiaohong President, Intelligence & Integrity Energy Technology Co., Ltd. ● Dr. Zhang Shengxiang Chief Expert, Huawei Digital Power SmartPV ● Guo Yezhou Senior Vice President, Energy & Infrastructure, Standard Advisory (China) Co., Ltd. ● Tan Wooi Leong Senior Executive Director- Group Energy, SURBANA JURONG Group ● Peter Thompson Director, East Asia Energy Business Leader, Arup ● Greg Mittman CEO, HySights
	Parallel Forum 2: Sustainable Financing for African Green Infrastructure —2026 Annual Meeting of the Mechanism for International Sustainable Infrastructure Promotion (MISIP) Amidst a surging global climate change and growing urgency for biodiversity conservation, the "nature-positive" goal set by the COP 15 Kunming-Montreal Global Biodiversity Framework is deeply aligned with the global green transition of infrastructure. Africa has huge infrastructure investment needs and abundant renewable energy potential. Leveraging climate resilience investment and blue finance as sustainable financing models to enable sustainable infrastructure that is both climate resilient and nature positive, has become a key direction for deepening China-Africa cooperation. As the 2026 MISIP Annual Meeting, this parallel session takes forward the commitments of the Forum on China-Africa Cooperation (FOCAC). It focuses on sustainable finance innovation, climate and nature-resilient infrastructure, and the integration of infrastructure development with forest protection and sustainable fisheries. By sharing real-world practices in implementing and financing nature friendly infrastructure, the session seeks to chart practical ways to support Africa’s green transition. Moderator ● Zhang Xiang Vice Chair, China International Contractors Association (CHINCA)

	Parallel Forum 3: International Engineering Smart Digitalization Development- Digital and Intelligent Empowerment Enables AI to Promote Digital Transformation of International Infrastructure Driven by artificial intelligence, large models and digital twins, the digital intelligent wave is comprehensively reshaping the whole process of R&D, design, construction, operation and maintenance in global infrastructure. The international engineering has evolved from informatization and digitalization into a new stage of in-depth digital-intelligent integration. AI has become a core engine for industrial efficiency improvement, model innovation and value upgrading. Booming global demand for digital infrastructure has made new digital infrastructure such as data centers and intelligent computing hubs a new opportunity for international engineering cooperation, creating fresh growth momentum for traditional enterprises. With the theme of "Digital and Intelligent Empowerment Enables AI to Promote Digital Transformation of International Infrastructure", this forum serves as a high-end exchange platform for the international engineering and technology communities. It focuses on the application of AI large models, practices of overseas digital infrastructure and the development of digital collaboration ecosystems. It explores how digital-intelligent integration can advance global infrastructure toward greater intelligence, sustainability and resilience, and jointly forge a new paradigm for the industry. 09:30-12:00 三层宴会厅 H	Parallel Forum 5: New Ecosystems, Models, and Technologies in International Mining Cooperation Amid a profound restructuring of the global resource landscape, China has been deepening its resource cooperation with Belt and Road partner countries. Consequently, overseas mineral development has become a key frontier for Chinese enterprises in their global expansion and international collaboration. As the global energy transition accelerates, "green, low-carbon, smart, and efficient" practices have emerged as the mainstream trend in international mining cooperation, presenting both new opportunities and challenges for the coordinated development of enterprises across the entire industry chain. The forum will focus on enhancing comprehensive management capabilities across the full lifecycle of overseas mining projects—including investment, construction, and operation. We have invited distinguished guests from Chinese and foreign government bodies, financial institutions, engineering enterprises, and related sectors across the industry chain to share their insights. The forum aims to deeply integrate Chinese technologies and services into the international mining cooperation system, foster high-quality collaborative development among enterprises along the industry chain, and provide new solutions and opportunities for global mining cooperation. Moderator ● Hou Yubo Industry Customer Director, Guangxi Liugong Machinery Co., Ltd. Welcome Remarks Speakers ● Hapenga Monty Kabeta Permanent Secretary, Ministry of Mines and Mineral Development, Zambia ● Yao Danbo Secretary General, China International Contractors Association Keynote Speeches Speakers ● Liu Yu Deputy General Manager, China Nonferrous Metal Mining (Group) Co., Ltd. ● Li Dongchun Vice President, Guangxi Liugong Machinery Co., Ltd. ● Zhang Chengwei Director General of Shandong Provincial Bureau of Geology & Mineral Resources ● Fu Qingqing Vice President, Oriental Yuhong Overseas Development Group ● Wang Kun General Manager, China Overseas Engineering Group Co., Ltd. ● Zhao Zengliang Deputy Chief Engineer, Guangxi Yuchai Machinery Group Co., Ltd.

14:30-16:30 Ballroom D Level 3	Parallel Forum 7: The 12th China-Portuguese-speaking Countries Infrastructure Cooperation Forum Artificial Intelligence Empowering China-PSC Infrastructure Cooperation to Enhance Quality and Efficiency
	Artificial Intelligence (AI) is emerging as a vital force driving the transformation and upgrading of global infrastructure. China and Portuguese-speaking Countries have established a solid foundation and achieved substantial results in traditional infrastructure cooperation. In the face of a new wave of technological revolution, deeply integrating AI throughout the entire process of planning and design, construction, operation and maintenance, safety management, and green transformation is essential to enhancing the quality and overall efficiency of China-PSC infrastructure cooperation. The Action Plan for Economic and Trade Cooperation (2024-2027), adopted at the 6th Ministerial Conference of the Forum for Economic and Trade Cooperation between China and Portuguese-speaking Countries (Macao) (Forum Macao), emphasizes support for Forum participating countries to strengthen cooperation in digital economy, infrastructure and other fields. To further implement the Action Plan, this parallel forum adopts the theme “Artificial Intelligence Empowering China-Portuguese-speaking Countries Infrastructure Cooperation to Enhance Quality and Efficiency” . It brings together government authorities, leading enterprises in infrastructure and artificial intelligence, financial institutions and other stakeholders from mainland China, Macao and Portuguese-speaking Countries. Invited guests will engage in in-depth discussions on the application prospects of AI in the infrastructure sector, share opportunities for new infrastructure project cooperation, and promote high-quality and sustainable development of infrastructure across mainland China, Macao and the Portuguese-speaking Countries. Keynote Speech Speakers ●Ji Xianzheng Secretary-General of the Permanent Secretariat of Forum Macao ●Fang Qiuchen Chairman, China International Contractors Association ●Han Liming Vice Chairman, Jiangsu Provincial Committee of the Chinese People's Political Consultative Conference ●Carlos Alberto Gregório dos Santos Minister of Ministry of Public Works, Urban Planning and Housing of Angola ●Fang Hai Vice-President of China Communications and Transportation Association

14:30-16:30 Ballroom D Level 3	Panel Discussion 1 Theme:New Opportunities for China–PSC Infrastructure Cooperation in the Context of AI Development China and the Portuguese-speaking Countries have built a strong foundation of cooperation in traditional infrastructure sectors such as ports, energy and transport. With the rise of the global digital economy, infrastructure development is accelerating towards intelligent, green and digital transformation, and artificial intelligence is becoming the core driving force for this shift. Against the backdrop of rapid global AI technological advancement, China–Portuguese-speaking Countries infrastructure cooperation is ushering in new opportunities. China has global leading advantages in AI applications for smart cities, digital twins and intelligent construction, while Portuguese-speaking Countries are actively advancing digital transformation, capacity building and economic diversification. In this context, what new opportunities exist for China–PSC infrastructure cooperation? How can Portuguese-speaking countries leverage AI empowerment and China’ s advanced technologies to the sustainable development of infrastructure?
	Moderator ●Tong Kai Chung Director-General of the Alliance for Studies on Cooperation between China and Portuguese-speaking Countries
	Speakers ●Francisco da Costa Monteiro Minister for Petroleum and Mineral Resources of Timor-Leste ●Rodrigo Santos Ferreira General Coordinator at the Undersecretariat for Development and Planning of Ministry of Transport of Brazil ●Amadú Bamba Sambú Dabó Director of Research and New Projects at the Ministry of Public Works, Housing and Urban Planning of Guinea-Bissau
	Panel Discussion 2 Theme:Developing China-PSC Smart Infrastructure Cooperation to Promote the Digital and Intelligent Transformation of Infrastructure International infrastructure investment and cooperation is currently undergoing a transition towards intelligent, green and digital models. Drawing on the respective strengths and development needs of China and the Portuguese-speaking Countries, what cooperation experience and potential exist in the field of developing smart infrastructure? How can Macao’ s role as a platform for China–Portuguese-speaking Countries cooperation be leveraged to innovate investment and financing models and promote the transformation and upgrading of China–PSC infrastructure collaboration? How can this help Portuguese-speaking Countries enhance infrastructure resilience, create high-value-added employment, advance economic diversification and inject new AI-driven momentum into comprehensive, mutually beneficial China–PSC cooperation?

14:00-16:30 Ballroom G Level 3	Parallel Forum 8: Exploring AI and Construction Robot in Macao's Construction Industry 2026 Annual Meeting of China’ s Mainland-Macao Belt and Road Business and Professional Services Council The global construction industry is accelerating its transformation toward smart and green development. The integrated application of artificial intelligence and construction robots serves as a key technological solution to address bottlenecks in industrial development, which can significantly improve construction efficiency, quality and safety. At present, large-scale public projects in Macao have widely adopted BIM technology, and related technologies such as smart construction sites and digital twins are gradually being piloted. However, the in-depth application of artificial intelligence and large-scale deployment of construction robots are still in the initial exploratory stage. Macao is characterized by scarce land resources, dense population and compact urban spatial layout. In line with the requirements for high-quality development of the local construction industry, there is an urgent need to optimize urban construction efficiency through intelligent construction technologies. This forum will focus on technological innovation and scenario-based application of artificial intelligence and construction robots, support the digital, intelligent and green transformation of Macao's construction industry, and promote cross-border cooperation and talent cultivation. 中國中鐵股份有限公司 | 簡介 |
CHINA RAILWAY GROUP LIMITED

中國中鐵擁有 120 多年的歷史淵源，是集勘察設計、施工安裝、工業制造、房地產開發、資源利用、金融投資、境外工程及其他新興業務為一體的特大型國有企業集團。位列 2025 年世界企業 500 強第 43 位，ENR 全球最大 250 家國際承包商第 2 名，工程項目遍布全球 100 多個國家和地區，在高速鐵路、重載鐵路、特大橋、長大隧道、鐵路電氣化、橋梁鋼結構、盾構及高速道岔的研發制造、汽車試驗場等方面，形成獨特的內控管理和技術研發優勢，能够提供建築業“縱向一體化”一攬子交鑰匙服務。橋梁修建技術處于世界先進水平，隧道及城市地鐵修建技術處于國際領先水平，鐵路電氣化技術代表着當前中國最高水平。參與建設的鐵路占中國鐵路總里程的三分之二以上，建成電氣化鐵路占中國電氣化鐵路的 90%，參與建設的高速公路占中國高速公路總里程的八分之一，建設了中國五分之三的城市軌道工程，研制生產的盾構機遠銷法國、意大利、阿聯酋、新加坡、以色列等 32 個國家。

中國中鐵自 20 世紀 70 年代承建坦贊鐵路為起點開啓國際化發展裏程碑，駐外機構及項目遍及全球 100 多個國家和地區，承建了包括雅萬高鐵、中老鐵路、亞吉鐵路、匈塞鐵路（匈牙利段）、孟加拉帕德瑪大橋及鐵路連接綫、埃塞亞的斯亞貝巴輕軌、以色列輕軌紅綫、烏茲別克斯坦安帕鐵路卡姆奇克隧道、安哥拉 Sequele 新城房建、剛果（金）華剛銅鈷礦、孟加拉國網絡三期項目等標志性項目。

With a history of over 120 years, China Railway Group Limited (CREC) is a large state-owned enterprise integrating survey and design, construction and installation, industrial manufacturing, real estate development, resource utilization, financial investment, overseas engineering and other emerging businesses. CREC ranked 43 among the Fortune Global 500 in 2025 and 2nd in the ENR Top 250 Global Contractors. Its projects span over 100 countries and regions worldwide. CREC has developed unique internal control and technological R&D advantages in high-speed railways, heavy-haul railways, large bridges, long tunnels, railway electrification, bridge steel structures, shield tunneling machines, high-speed railway turnouts, and automobile proving ground. It offers vertical integration one-stop turnkey services in the construction industry. CREC's technical expertise in bridge, tunnel and urban rail transit construction is globally advanced, and its railway electrification technology represents the highest level in China. In China, CREC has contributed to the construction of more than 2/3 of total railway mileage, 90% of electrified railways, and approximately 1/8 of expressway mileage and 3/5 of urban rail transit projects. The shield tunneling machines independently developed and manufactured by CREC have been exported to 32 countries, including France, Italy, the UAE, Singapore, and Israel.

CREC marked a milestone in its international development by undertaking the construction of the Tanzania-Zambia Railway (Tazara) in the 1970s. Today, its overseas offices and projects are spread across more than 100 countries and regions. CREC has implemented a series of landmark international projects including but not limited to the Jakarta-Bandung High-Speed Railway in Indonesia, the China-Laos Railway, the Addis Ababa-Djibouti Railway, the Hungary-Serbia Railway (Hungary section), the Padma Bridge and Rail Link Project in Bangladesh, the Addis Ababa Light Rail in Ethiopia, the Red Line Light Rail in Israel, the Qamchiq Tunnel of the Angren-Pap Railway in Uzbekistan, the Sequele New Town Housing Project in Angola, the Sicomines Copper-Cobalt Mine in the Democratic Republic of the Congo, and the Development of National ICT Infra-Network for Bangladesh Government Phase-III.

China's Mainland-Macao Belt and Road Business and Professional Services Council (BRBPSC)

China's Mainland-Macao Belt and Road Business and Professional Services Council (BRBPSC) is a non-registered organization initiated by China International Contractors Association (CHINCA) and Macao Chamber of Commerce (MCC), with the supports of Chinese Ministry of Commerce and the Macao SAR Government. BRBPSC is comprised of leading companies and professional institutions on a voluntary basis.

BRBPSC aims to strengthen communication and collaboration among companies and institutions from China's Mainland and Macao; fully leverage their comparative advantages and seek synergy on cooperation along the Belt and Road countries; provide professional consulting services for companies and institutions on China's Mainland-Macao cooperation; support the integration of Macao into the development of the country.

BRBPSC consists of chairman, members and the secretariats. China State Construction Engineering Corporation Ltd. assumes the positon of Mainland Chairman. CHINCA acts as the mainland secretariat, while MCC plays the roles of both the secretariat and Chairman for the Macao side. BRBPSC's members include leading chambers of commerce, professional associations, renowned companies and institutions in China's Mainland and Macao.
